Should the MHTC exercise its right to cancel the contract for such reasons, cancellation will become effective upon the date specified in the notice of cancellation sent to the Contractor.
- b. If the MHTC cancels the contract for breach, the MHTC reserves the right to obtain the equipment, supplies, and/or services to be provided pursuant to the contract from other sources and upon such terms and in such manner as the MHTC deems appropriate and charge the Contractor for any additional costs incurred thereby.

Bankruptcy or Insolvency

- a. Upon filing for any bankruptcy or insolvency proceeding by or against the Contractor, whether voluntary or involuntary, or upon the appointment of a receiver, trustee, or assigned the benefit or creditors, the Contractor must notify MoDOT immediately. Inventions, Patents, and Copyrights

In addition, all equipment, supplies, and/or services which are discovered to be defective or which do not conform to any warranty of the Contractor upon inspection (or at any later time if the defects contained were not reasonably ascertainable upon the initial inspection) may be rejected.
- c. The MHTC reserves the right to return any such rejected shipment at the Contractor's expense for full credit or replacement and to specify a reasonable date by which replacements must be received.
- d. The MHTC's right to reject any unacceptable equipment, supplies, and/or services shall not exclude any other legal, equitable or contractual remedies the MHTC may have.

Warranty

- a. The Contractor expressly warrants that all equipment, supplies, and/or services provided shall: (1) conform to each and every specification, drawing, sample or other description which was furnished to or adopted by MoDOT, (2) be fit and sufficient for the purpose expressed in the solicitation documents, (3) be merchantable, (4) be of good materials and workmanship, and (5) be free from defect.

Temporary Suspension of Work

- a. The **District Engineer** shall have authority to suspend work wholly or in part for such period or periods as may be deemed necessary when weather or other conditions are such that in the opinion of the engineer, the work may be done at a later time with advantage to the Department or for failure on the part of the Contractor to comply with any of the provisions of the Contract.
- b. If the Department suspends the work for its own advantages and not because of the Contractor's failure to comply with the Contract, the Contractor will be allowed an equal number of calendar days after the completion date for the completion of the work. If, within ten (10) days after such notice the Contractor/supplier does not proceed to remedy to the satisfaction of the Department's representatives the faults specified in said notice, or the surety does not proceed to take over the deliveries, the Department shall have full power and authority, without impairing the obligation of the Contractor/supplier under the contract or the surety under the bond, to take over the completion of the work and arrange for the shipment of any materials necessary to complete the work and the Contractor/supplier and the surety will be responsible for any additional costs incurred by the Department in obtaining the completion of the deliveries.

Liquidated Damages

- a. In the event the successful Contractor fails to deliver the material within the time specified, the Department and the public will sustain damages because of such delay in delivery, the exact extent of which would be difficult to ascertain, and in order to liquidate such damage in advance it is agreed that the **sum of one-thousand dollars (\$1000.00) per calendar day, per item**, for each assessable calendar day on which the work has not been completed, is reasonable and the best estimate which the parties can arrive at as liquidated damages, and it is therefore agreed that said amount will be withheld from payments due the Contractor or otherwise collected from the Contractor as liquidated damages.
- b. **Saturdays, Sundays, holidays and days whereas the Department has suspended work** shall not be assessable days.

Environmental Issues

- c. Attention of the bidder is invited to the **Land Reclamation Act, Chapter 444, Laws of 1971, (House Bill 519)** and the necessity for compliance if applicable.
- d. The Contractor shall take necessary precautions and shall schedule and conduct his operations so as to avoid or minimize siltation of streams while removing gravel there from.

SCOPE OF WORK

D610-009-RW BRIDGE HYDRODEMOLITION

The scope of this project only includes hydrodemolition of marked areas of the deck at two designated bridge locations:

This project involves both contractor and MoDOT labor and resources. It is important that the contractor understand that coordination with MoDOT is critical to the success of the project. All traffic control is the responsibility of MoDOT. It is the intent to close the bridge during the hydrodemolition process. The contractor will have two days at each bridge to complete all marked areas of deck to be repaired (approximately 2000 square feet each). Liquidated damages will be assessed for failure to complete the demolition work and clean-up within the prescribed time frame.

The project location for this quotation is Route Z in northwestern Lincoln County. The bridge numbers are A2595 and A2596.

MoDOT will perform any milling (approx. $\frac{1}{2}$ " scarification) ahead of the hydrodemolition work.

Hydrodemolition. The contractor shall supply a self-propelled robotic hydrodemolition machine, with operators, for the purpose of removing unsound and sound concrete from the bridge deck. The contractor is responsible for all equipment, parts and labor to perform the necessary hydro demolition work. The work includes partial surface hydrodemolition of the deck at designated locations, as close as the machine will operate against the curb.

The equipment shall be capable of achieving large production rates. The equipment must demonstrate the ability to achieve the desired cutting depth ($1\frac{1}{2}$ ") on sound concrete with a single pass and utilize a minimum of 55 gallons per minute, and capable of pressures in excess of 13,000 psi. A test strip will be used to calibrate the machine cutting depth on sound concrete on the bridge. The resulting surface shall be one that is roughened and highly bondable. Any equipment servicing is the responsibility of the contractor.

Partial Surface Hydro demolition of Concrete is based on the calibration to cut into good concrete. There may likely be deteriorated concrete that may lead to much deeper cutting by the machine. This will not be grounds for any additional pay. All payment is based on the area of cut and not adjusted for depth or volume of material removed.

All water (potable) is to be supplied by the hydrodemolition contractor. All hoses, fittings, etc. necessary to get water from the source to the equipment will need to be provided by the contractor. It is likely that a hydrant will NOT be available within a reasonable proximity of the bridge, for a direct water source. The contractor should plan on having an alternate source (water truck) available to supply water. MoDOT at the site will perform runoff control.

As the deck is being hydrodemolished, the contractor must also provide an adequate method to block any flying debris as the work progresses. The contractor will be responsible for claims against the department due to flying debris caused by his negligence. Hydrodemolished debris shall be picked up at least at the conclusion of each pass of the hydrodemolition equipment. This shall be done in a manner that does not damage any exposed reinforcing steel. The contractor can either haul the rubble from the site and dump at a nearby MoDOT

maintenance facility or the material can be dumped at the bridge site and loaded onto MoDOT trucks to haul off. If the material is dumped at the site, the contractor needs to provide the means (loader, bobcat) to load the trucks for disposal.

Upon completion of all hydrodemolition work the contractor will be required to thoroughly flush the deck surface of all debris. Sounding and additional removals of concrete delaminations that remain on the deck will be the responsibility of MoDOT to remove.

Payment for "Partial Surface Hydrodemolition (1/2")" shall be based on the total square feet of deck coverage, regardless of depth. Upon completion of hydrodemolition, measurements of the hydrodemolished areas will be taken and payment made upon approval of measurements by the Engineer.

Deck Repair. It shall be the responsibility of MoDOT to perform all deck preparation and repairs, after the hydrodemolition and clean-up.

Mobilization. There is a lump sum pay item for mobilization. This one lump sum mobilization is to cover both bridge locations. There will be no additional pay if the contractor has to move off the site from one bridge and return at a later date.

Liquidated damages. The contractor has two (2) calendar days at each bridge to complete the hydrodemolition work, which includes all clean-up. Liquidated damages of \$1000 per day shall be assessed for each day the contractor fails to complete the hydrodemolition work, provided the surface area does not exceed 3000 square feet per location. If the quantity of repair exceeds this amount an extra day will be granted to the contractor.

Job Scheduling and completion. The intent of this job is to as quickly as possible hydroblast (by contractor) and patch (by MoDOT) the existing bridge decks. Only one bridge may be closed at a time. Deck repairs and cure must be completed on a bridge before the adjacent bridge can be closed. The contractor must diligently work to complete the work in the fewest days possible to minimize traffic disruptions, since the bridge is closed to traffic.

A completion date of August 15, 2009 has been established for the work on these bridges in order to avoid closures during school, which can significantly impact school bus traffic. Liquidated damages of \$1000 per calendar day (in addition to other liquidated damages listed above) may also be incurred for failure to meet this project deadline.

Please advise the Engineer as soon as possible regarding scheduling of work in order to allow coordination of bridge closures for work items.
